This document shows an example of the use of the \textit{subeqnarray} environment. Here is one:

\[
x = a \times b \quad (1a)
\]
\[
= z + t \quad (1b)
\]
\[
= z + t \quad (1c)
\]

The first equation is number 1a, the last is 1c. The equation as a whole can be referred to as equation 1.

To show that equation numbers behave normally, here’s an \textit{eqnarray} environment.

\[
x = a \times b \quad (2)
\]
\[
= z + t \quad (3)
\]
\[
= z + t \quad (4)
\]

These are equations 2, 3 and 4.
