

# CS1670 Gradescope Guide

(adapted from CS1410's gradescope guide)

Spring 2019

## 1 Setting Up Gradescope

### 1.1 If you're new to Gradescope

Sign up as a student on [gradescope.com](https://gradescope.com). The course entry code is 98K6PK. Instead of using your real name, go to [uuidgenerator.net](https://uuidgenerator.net) and use the first five characters of the uuid displayed. For your student id, put your cslogin.

### 1.2 If you already have an account

Login to your account and click on the "account" box in the bottom left. Then select "edit account". Re-enter your password if prompted to do so. Go to [uuidgenerator.net](https://uuidgenerator.net) and take the first five characters of the uuid displayed. Replace your real name with these characters. Also, set your student id to your cslogin. Only after doing this, go to the main Gradescope page and enroll in the course using the course code 98K6PK. If you need your name or student id to be other values for another course you're also enrolled in this semester, you should instead create a new Gradescope account for use with CS1670. You can (but are not required to) use your cs email address ([cslogin@cs.brown.edu](mailto:cslogin@cs.brown.edu)) to sign up.
