

CS169: Operating Systems Project

Course Information and Syllabus Semester II, 2016–2017

Format	Half-credit lab course
Sessions	Occasional Tuesday and Thursday evenings, 8–9pm. The first meeting is on February 9.
Room	TBA
Notes	Handed out in class
Corequisite	CS 167
Instructor	Tom Doepner (twd@cs.brown.edu)
Office	CIT 405, x3-7633
Office Hours	Mondays and Wednesdays 3 to 4, Fridays 4 to 5, by appointment, or just stop by.
Head TA	Kyle Laracey (klaracey@cs.brown.edu)
Grad TA	Archita Agarwal (archita@cs.brown.edu)
UTAs	Ian Boros (iboros@cs.brown.edu) Isaac Davis (imdavis@cs.brown.edu) Egor Shakhnovskiy (eshakhno@cs.brown.edu) Di Yang Shi (ds65@cs.brown.edu)
Requirements	1 Program; 5 deadlines: Processes due February 13 Drivers due February 22 Virtual File System due March 13 S5FS (File System) due April 10 Virtual Memory due May 9
Time Requirements	You are expected to be taking this course along with CS 167. The additional time you will spend on this course will be 8 to 10 hours per week. Thus the time required for both courses, in addition to three hours spent in class for CS167, is 20 to 30 hours per week. Note that you will likely spend more time per week in the latter half of the course than in the first half.
Goals	The primary goal of this course is to gain additional practical experience with constructing operating systems, beyond that which

	<p>is obtained in CS167. You will gain a greater understanding of a large code base and work with portions of it that students doing just CS167 won't have time to encounter. In particular you will work with, among other portions of the system, the virtual memory system and its interplay with the file system.</p>
All Are Welcome	<p>Our intent is that this course provide a welcoming environment for all students who satisfy the prerequisites. Our TAs have undergone training in diversity and inclusion; all members of the CS community, including faculty and staff, are expected to treat one another in a professional manner. If you feel you have been treated unprofessionally by any of the course staff, please contact either Prof. Doeppner (the instructor), Prof. Cetintemel (the department chair), or Laura Dobler (the department's coordinator for diversity and inclusion initiatives). We take all complaints about unprofessional behavior seriously.</p>
Grading	<p>While we will give you written and oral feedback on your progress on the course project, your grade in the course depends solely on how well the final version of your project works.</p>
Late Policy	<p>All deadlines other than the last are relatively soft: being a few days late is ok. But the final deadline, May 9, is firm.</p>
Incomplete Policy	<p>We expect everyone to complete the course on time. However, we certainly understand that there may be factors beyond your control, such as health problems and family crises, that prevent you from doing so. If you feel you cannot complete the course on time, please discuss with Prof. Doeppner the possibility of being given a grade of Incomplete for the course and setting a schedule for completing the course over the summer.</p>
Accommodations	<p>If you feel you have physical, psychological, or learning disabilities that could affect your performance in the course, we urge you to contact SEAS (https://www.brown.edu/campus-life/support/accessibility-services/). We will do whatever we can to support accommodations recommended by SEAS.</p>
Mental Health	<p>Being a student can be very stressful. If you feel you are under too much pressure or there are psychological issues that are keeping you from performing well at Brown, we encourage you to contact Brown's Counseling and Psychological Services (CAPS: https://www.brown.edu/campus-life/support/counseling-and-psychological-services/). They provide confidential counseling. In addition, the deans of student life as well as the deans of the college can provide notes supporting extensions on assignments for health</p>

	reasons.
