

Specific Testing Milestones

March 15th, 2006

- Specific Test Program Written
 - calls every routine
 - * with different input
 - * in different orders
 - * with bad input
 - download some html
 - * compare correct solution to current solution
 - * who? when?
 - commits
 - any change
 - pre-commit - sheriff-enforced
 - every day?, every hour?, every 5 seconds?
- Same thing with Integration
- Manual Scenario Testing
- Stress Testing
 - C++
 - bots loading the server
- Get Friends to Play
- Fix Compiler Warnings
- Defensive Coding?
 - Assertions
 - * if error could occur from weird user cases and server problems, etc., then your function shouldn't crash (because of using asserts), but otherwise, you can use them.
 - Exceptions
- Step through code in debugger to verify the data is as it should be
