CVS Help & Meeting Notes

March 17th, 2006

1 Using CVS

1.1 to set up CVS

```
cd /u/geoevents/project
mkdir <login>
setenv CVSROOT /u/geoevents/project/cvsroot or use global -d
option
cvs [-d cvsroot] -P geoevents
```

1.2 to update your code

```
cvs [-d cvsroot] update -dP
```

2 Meeting Notes

- Multiple requests from Server could spawn multiple
  EventParsers

  - changes need to be made to Concierge

- Concierge can't be tested until GUI is written

- Weather might be slow since we are parsing on the fly

  - possibility of caching last 100 weathers?

- add flush function to Events Database

- email problem for a server, cc dhl
