

# Group Dynamics

## 1 Suggestions

- talk to users to confirm requirements document
- smaller group meetings with specific goals
- user testing
- make sure you know that everyone is doing what they're supposed to be doing
- get critical path done early... for that matter, define critical path
- get donut preferences

## 2 Post-Mortem Documents

1. Good Things
2. Define Problem
3. Concrete Fixes

## 3 GeoEvents: Define Problem

- not done coding on time
- internal deadlines feel soft
- break work hard
- progress not clear

## 4 GeoEvents: Concrete Fixes

- budget better for break
- don't bind to class deadlines
- bring laptop to Panama
- adjust schedule
- coding session
- personal (1-1) accountability
- think about big schedule picture
- more specific deadlines i.e. "all priority 1"
- identify "waiting" - critical path
- one person knowing what's happening
- WOWS!
- email status
