This reading comprises excerpts from a working draft of a book by Bill Buxton, a former professor (who was Jeff's PhD advisor's advisor's advisor) who is currently at Microsoft Research. Despite being a fairly rough draft, it is still by far the best reading about input techniques.

Please respond to the following prompt: In Chapters 1 or 4, are these features for classification fairly complete, or are there other ways to categorize input devices that you can think of?

**Please be diligent about submitting your comment on Gradescope by 12:00pm.** Reading comments will receive 0 points if it is irrelevant, 1 point if they do not relate well to the reading, 2 points for relevant and interesting comments, and a small number of comments (about 15%) will receive 3 points for exemplary and highly insightful thoughts. Late or missing reading comments will not be graded and will receive a 0.

*Keep comments below 200 words. If your comment is more than 200 words, you will not be eligible to receive the 3 points.*
