1 Readings

- Exploring Multi-Stakeholder Internet Governance by John Savage and Bruce McConnell, EastWest Institute, Fall, 2014

- The Final Acts of the 2012 World Conference on International Telecommunications (WCIT-12), the 2012 revision in the International Telecommunications Regulations (ITRs)

- New challenge to US hegemony: Masters of the Internet, The US calls loudly for Internet freedom, but it is Google, Facebook, Microsoft, Apple and Amazon that have built up the dotcom services used by people all over the world. Is that now about to change? by Dan Schiller, Le Monde Diplomatique, February 2013.

2 Optional Resources

- Why You Should Care About Net Neutrality, a very good video produced The National Journal.

- Final Acts of the 1988 World Conference on International Telecommunications (WCIT-88), the 1988 revision in the International Telecommunications Regulations (ITRs)

- ITU Council Working Group for WCIT-12, Draft Proposals for Revisions of the ITRs, an important compilation of revisions prepared for WCIT-12.

- The WCITLeaks website, a repository of many of the documents prepared in connection with the WCIT. These documents remain confidential unless they have been provided by a member state.

- Map showing the location of the root operators

- A Novice’s Guide to the Internet Engineering Task Force (IETF)
