The annual Paris C. Kanellakis Memorial Lecture honors Paris Kanellakis, a distinguished computer scientist who was an esteemed and beloved faculty member of the Brown Computer Science department. His research area was theoretical computer science, with emphasis on the principles of database systems, logic in computer science, the principles of distributed computing and combinatorial optimization. He died in an airplane crash on December 20, 1995, along with his wife, Maria Teresa Otoya, and their two young children, Alexandra and Stephanos Kanellakis. The ACM Paris Kanellakis Theory and Practice Award and Kanellakis Graduate Fellowships at both Brown and MIT have been established in his memory.
