1 Introduction

Cybersecurity and International Relations is a course designed to encourage computer scientists to think about policy and international relations issues, and to encourage political scientists to consider issues rooted in technology. Throughout the semester, students are required to submit 5 short papers in response to the week’s readings.

Students are required to turn in papers according to the due dates listed on the course website, with the responses referring to the readings available between response dates. Late papers will be not be accepted, barring emergencies.

2 Readings

- After Egypt: The Limits and Promise of Online Challenges to the Authoritarian Arab State
- Cyberconflict and National Security
- Harold Koh on International Law in Cyberspace
- Reading: Harold Koh La Out U Government Poition on Cerpace and International Law
- Stuxnet, Schmitt Analysis, and the Cyber “Use-of-Force” Debate
