

# **CSCI 1951k Collaboration Policy**

Spring 2020

Students are encouraged to collaborate with their peers in CSCI 1951k. When working on assignments, students may consult one another; but are then required to list the names of all students with whom they discussed an assignment on their submitted work. Additionally, each pair of students is expected to write up their own solutions to the homework. Unnatural similarities among students' submissions with other students whose names are not listed OR extreme similarities among submissions from two different pairs will be forwarded to the Dean of the College's office for review, to assess whether or not there has been a violation of Brown's Academic Code. If you have any questions about this policy, please ask the course staff for clarification. Not understanding our policy is not grounds for not abiding by it.

To sign this collaboration policy, please complete the [Google Form](#) before you submit the first homework assignment, so before Tuesday, January 28 at 9:00 p.m.
