

Capstone CSCI 2950V: Topics in Applied Cryptography.

Here is the relevant information:

- **Title:** Protest Mix
- **Abstract:** We present an analysis of the current state of IMSI-catcher use for police surveillance and the methods of preventing tracking. We discuss what improvements might be made to existing systems, with a focus on the use case of protests, and describe two possible ways to improve communication while preventing police from accessing phone information and GPS location.
