

# Who is Artemis?

The coordinators for this year are:

Lyn Fong	Gianna Giancarlo
Molly Junck	Li Jun Pek

We are the coordinators for the Artemis Project 2007-- four undergraduate women attending Brown University. We are all studying computer science here at Brown, as well as other subjects. From visual arts to outdoor sports to 3D animation, we have a many different interests that include and range outside of computer science.

We are all super excited to be coordinating the Artemis Project this summer! Please contact us with the information provided on the back of this handout with any questions you may have about the Artemis program. We would be delighted to speak with you.

And please visit our website! [www.cs.brown.edu/orgs/artemis](http://www.cs.brown.edu/orgs/artemis) There is an application available as well as more information about the camp.

*The Artemis Project is named after the Greek goddess of the hunt. She was widely known for her strength of both body and spirit, her independence, and her courage.*

## A Big Thank You To:

Our faculty advisor, Meinolf Sellmann

Our generous sponsors, Microsoft, Google, Goldman Sachs, and Cisco Systems

The Brown University Undergraduate Teaching and Research Assistantship (UTRA)

All the past Artemis coordinators, including Victoria Bartolome, Hong Chau, Sarah Filman, and Arushi Pasricha

## What is Artemis?

### Goals and Purpose

The Artemis Project is a free five week summer program for girls entering the 9th grade who are interested in learning about science and technology. Absolutely no experience with computers is necessary to attend this program.

The purpose of this program is to foster confidence and leadership skills and to build computer and learning skills that will help girls succeed in their academic careers.

**This program is entirely free of cost**—all meals, field trips, supplies, and bus passes are paid for.

### Dates

The Artemis Project is held on the Brown University campus from

**June 25 - July 27, 2007**

Monday through Friday, 9 AM - 3:30 PM. There will also be a family event on Saturday, July 28, 2007.

## What will you learn?

During the Artemis Project, you will learn

- practical skills in word processing, navigating the internet, and creating your own web page
- basic computer skills by using Windows, Apple, and LINUX computer systems
- how computer animated movies are created
- how artificial intelligence works by building your own smart robots
- the ways big technology companies function by listening and interacting with guest speakers from those companies
- problem solving and leadership skills through exciting games and fieldtrips
- how technology can impact your future through emailing pen-pals and mentors involved in computer science

## Who Can Apply?

Girls entering the ninth grade in fall 2007 who are creative, motivated, and curious about math, science, computers, or technology are qualified to apply to the Artemis Project. **There is absolutely no computer experience necessary in order to apply or to attend Artemis.**

## How do you apply?

If you do not have an application, you can get one from our website, [www.cs.brown.edu/orgs/artemis](http://www.cs.brown.edu/orgs/artemis) or you can contact us directly using the contact information on the back and we will mail one to you. Your school counselor may also have information about or applications for the Artemis Project.

**APPLICATIONS ARE DUE BY  
TUESDAY MAY 1st!**
