Artemis Project 2008
June 23 – July 25, 2008

Teacher Recommendation Form

We have requested students interested in the Artemis Project to provide a teacher of their choice with this form. We would like to have as complete and helpful an impression of the student as possible. While we realize that a full description is impossible to provide in such a limited amount of space, we feel that your input will be valuable in helping us to know the applicant better.

Student's name:_____

Your name:_____

Subject(s) taught:_____

Years you've known the student:_____

1. Please give us your general impressions of the applicant. Is she able to stay on task? Does she make valuable contributions to your class environment? How would you describe her curiosity and motivation? Has she shown any initiative beyond the required classwork?

2. Please describe a specific situation in which the applicant has worked with other students (for example, a group project.) How did the applicant interact with the other members of the group? What sort of role did she take within the group? If any conflict arose, was she able to handle it well?

3. The Artemis Project was founded in response to a noticeable trend of girls losing interest in science and technology once they enter high school. Our goal is to motivate girls in these areas and give them increased confidence in their abilities in fields that traditionally have been regarded as "off-limits" to girls. To what extent do you think the applicant could benefit from such a program?

4. If there is anything else you would like to tell us about the applicant? If so, please feel free to do so below.

Please return this form to the applicant in a sealed envelope. This application is due on April 19th. Thank you for your input!
